

Show your Claude Certifications

Earned **Claude 101** or **Claude Code 101**?

Add them to your builder profile — they light up as **amber badges** on your card at **vibecode.tours**.

Optional. Only add a cert you actually earned — each badge links to your public Skilljar verification.

How to add (English)

1. Open your builder file: `src/content/builders/<your-github>.md`
2. Add a `certs:` block in the frontmatter — keys **indented under** `certs:`, not at the top level.

```
certs:  
  claude_101: https://verify.skilljar.com/c/XXXXXXXXX  
  claude_code_101: https://verify.skilljar.com/c/YYYYYYYYY
```

3. Commit, push to your fork, open a Pull Request.

We recommend the full verify URL (badge links to your proof). The bare Skilljar code also works.

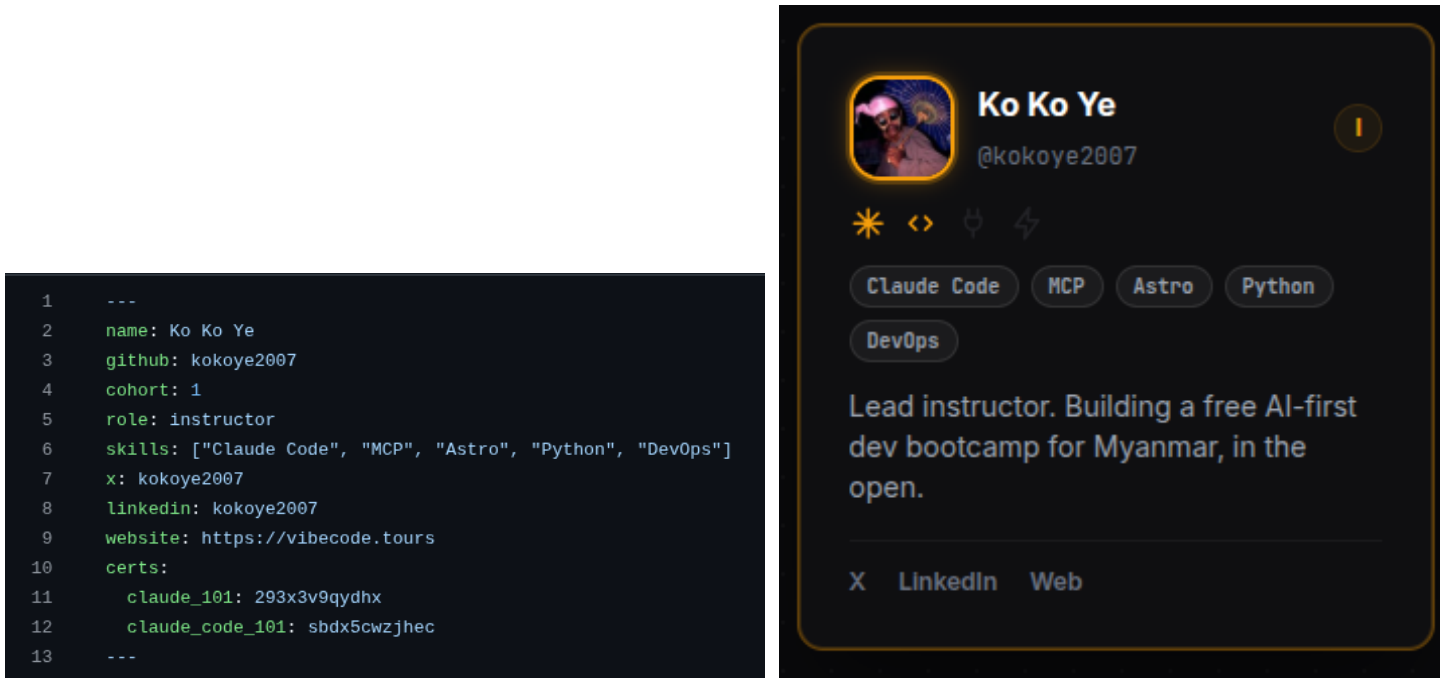

How to add (မြန်မာ)

1. သင့် builder file ဖွင့်ပါ: `src/content/builders/<သင့်-github>.md`
2. Frontmatter ထဲမှာ `certs:` block ထည့်ပါ — key တွေ `certs:` အောက်မှာ **indent** ထားရမယ်၊ top level မှာ မထားရ။

```
certs:  
  claude_101: https://verify.skilljar.com/c/XXXXXXXXX  
  claude_code_101: https://verify.skilljar.com/c/YYYYYYYYY
```

3. Commit လုပ်ပြီး fork ကို push၊ Pull Request ဖွင့်ပါ။
verify URL အပြည့် သုံးဖို့ အကြံပြုတယ်။ bare code လည်း ရတယ်။

What it looks like

Left: the `certs:` block in your profile `.md`.

Right: your card on vibecode.tours — earned = amber, next 2 = grey targets. 🌟

! Common mistake

Putting `claude_101:` at the **top level** instead of under `certs:` .
It silently won't show.

✓ Always **nest under** `certs:` . The CI check now warns you if you slip.

Known ids: `claude_101` · `claude_code_101` · `mcp_intro` · `agent_skills_intro` · `subagents_intro` ·
`claude_code_in_action` · `building_claude_api`
